

**S**ecor is a place of distinct contrasts. Tall timber gives way to second growth forest, rolling sand areas fade to lowlands that are usually wet and thickets open into meadows and prairies. This 600-acre park is part of the rare and beautiful Oak Openings Region.

**I**t is also home to the National Center for Nature Photography – a one of a kind facility designed to inspire reverence for natural fauna, flora and their habitats through photography. It features stunning photography from around the world.
