

What makes a great park? As we move into the master planning process, we need to understand what it takes to build a solid foundation for a successful and vital park. This means basic infrastructure, healthy habitats, parking, places for people and more.

RIPARIAN HABITAT RESTORATION

- Shoreline stabilization
- Submergent, marsh, emergent, and forested wetland creation
- Habitat structures: Fish, herpetological, avian, mammal

UPLAND HABITAT RESTORATION

- Prairie, savannah, forest habitat creation
- Habitat structures: herpetological, avian, mammal

WATER ACCESS

- Kayak landing and rental facility
- Overlooks, fishing platforms/piers
- Shoreline experience, Steps/ramps

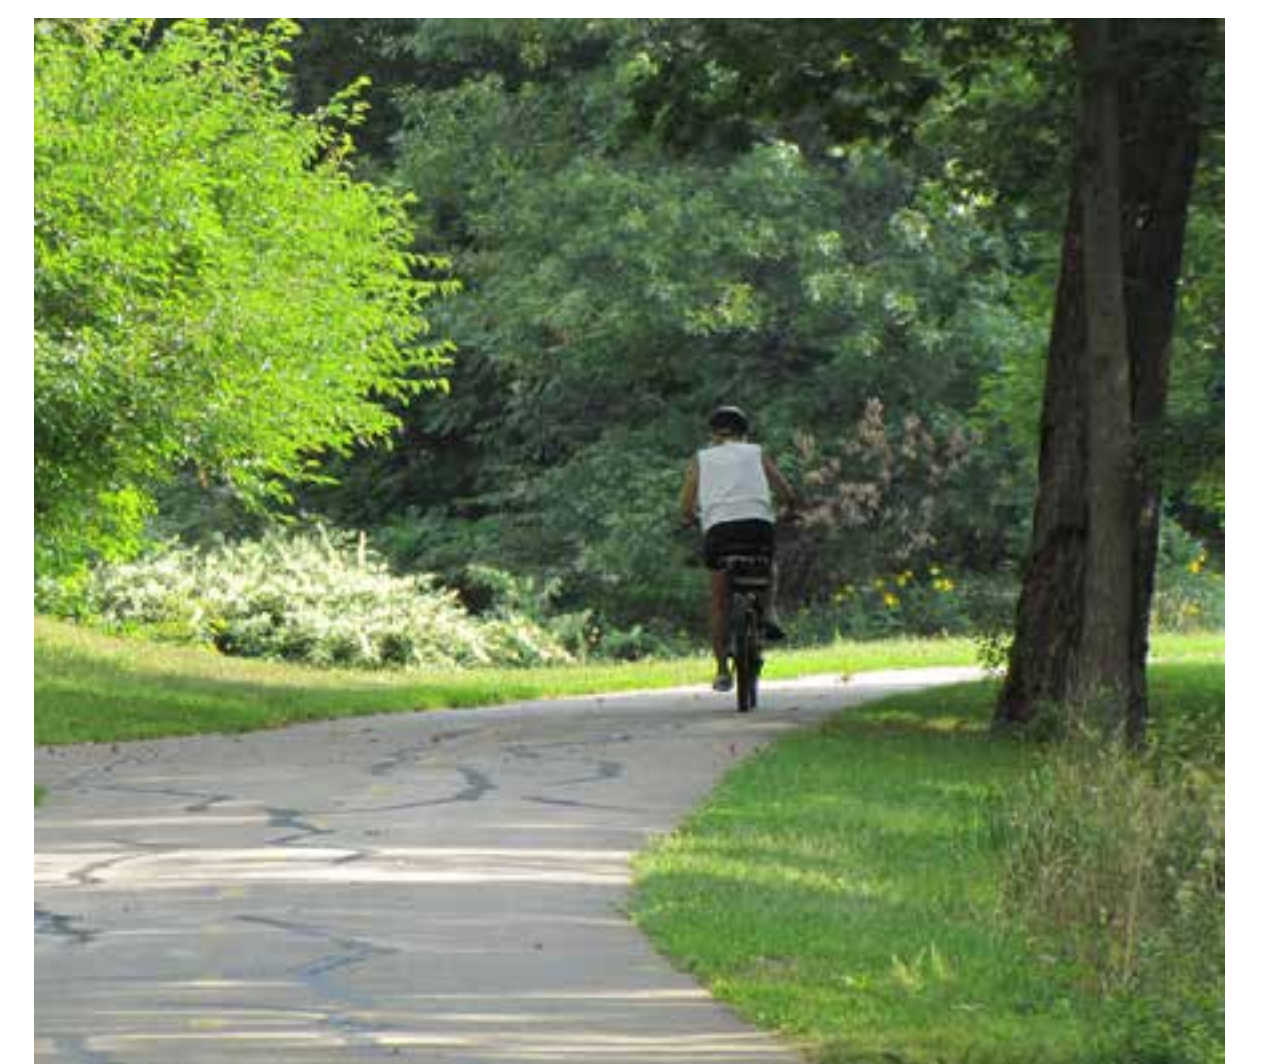

COMMUNITY GATHERING SPACES

- Event lawn
- Plaza space
- Amphitheater

SUSTAINABLE PARKING

- Stormwater management
- High albedo surfaces
- Trees for shading

TRAILS AND PARKWAYS

- Multi-use paths
- Regional trail connections
- Park wayfinding

PICNICKING AND SMALL EVENTS

- Grills
- Fire pits
- Pavilions
- Picnic tables

BASIC INFRASTRUCTURE

- Wayfinding
- Interpretive signage
- Bike repair station
- Variety of seating
- Restrooms
