

Camouflage Scavenger Hunt

There are many things camouflaged in your very own neighborhood! Find these animals, insects and more in your backyard or go on a walk with an adult to check these off your list.

- Find a squirrel on a tree or in some bushes. Their coloring makes hanging on a tree a great hiding spot.
- Look for a green bug on a green leaf. Watch how they hold very still so predators won't see them.
- Observe a bird hidden and consider how the different birds' colorings and markings help them hide in different habitats.
- Try to spot a frog or toad hopping in damp areas.
- Look at the ground and count how many ants and other insects you see scurrying around.
- Try to spot deer hiding in our wooded areas.
- What other camouflaged animals and insects can you find?

AT-HOME FUN: Find 10 objects using camouflage and hide them around the house. Challenge a friend or adult to find them!
