

Week 2 Virtual Camp Sampler

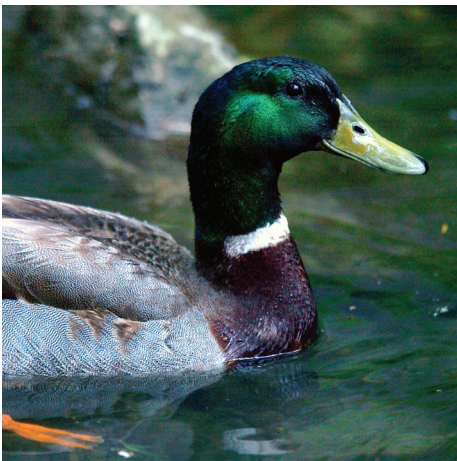

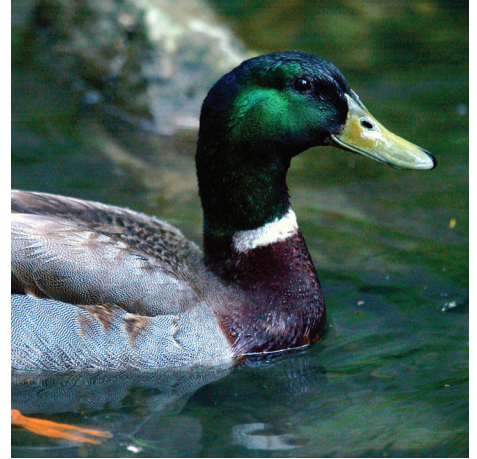

(Ages 5-7)

**METROPARKS
TOLEDO**

MONDAY

Memory Matching Game: Cut out the pictures below. Flip each over so the picture is facing down and mix them up. See if you can pair the matching animals together as you flip over each card one at a time.

TUESDAY

Nature's Nursery: Nature's Nursery Center for Wildlife Rehabilitation and Conservation Education provides medical care to injured, orphaned or ailing wild animals and teaches children and adults about co-existing with Northwest Ohio wildlife. Check out this video to learn more.

WEDNESDAY

Duck Craft

Materials: Halved Paper Plate, Green and Brown Markers, Glue Stick, Scissors, construction paper (green, orange, and yellow), Googly Eye (optional), Craft Feather (optional)

Directions: Color Your Plate. Use your green marker to color the smooth center of your plate. Use your brown marker to color the ridged, outer edge of your plate.

Cut out your feet, beak, and head. Use the orange construction paper to cut out two feet, use the yellow construction paper to cut out your beak, and use the green paper to cut out your head.

Attach the pieces: Using your glue stick. Glue your beak and googly eye to the head. Glue the two feet and head to the back of the plate like in the photo below. Make sure the googly eye is facing the same way as the colorful side of your plate.

Flip your plate back over and glue your feathers to the center of your plate. You are all done, enjoy your feathered friend.

THURSDAY

Nature Journal: Have an adult help you find some fallen leaves or other nature items that are safe to touch. Try to choose items with texture. Arrange the items on a piece of paper so they look like animals. Place another piece of light colored paper on top. Peel the paper off a crayon and hold the crayon sideways/flat against the paper and rub the area where the leaf is underneath to create an animal friend leaf rubbing.

FRIDAY

Up-cycled Birdfeeder: Attract smaller birds with this mini-birdfeeder made with a cardboard toilet paper roll and your creative ingenuity! Old milk jug or juice caps fit nicely as lids for the tops and bottoms of the roll, and an old pencil (broken, not sharpened) or a recycled plastic straw work great for a perch.

Tip: Poke your holes for the perch and send it through the tube just below the bottom milk jug cap, so you don't even need to tape the bottom of your roll to keep your seeds from falling out. If you have no juice or milk caps, you could cut and tape a piece of the plastic from the baggie holding the oilers to cover the top and bottom of your tube.

Hang your mini-feeder with any kind of string.
